MIXER

EL 1500

Application:

This mixer has been designed to provide stable and homogeneous emulsions in any concentration. It can be used to mix all water-soluble concentrates.

Adjustment is made with a linear fine regulating valve with zero shut-off. It can be used to regulate water and oil. The emulsion feed hose can be extended and shut-off as required.

In contrast to Venturi mixers, the EL mixer works with a static mixer.

This mixer is suitable for direct connection to drinking water pipes according to DIN EN 1717. The backflow preventer type AA is suitable for the fluid categories 2, 3, 4, 5.

The specified backflow preventer is included in the scope of supply.

Capacity:

EL 1500:
1500 l/h, water pipe 3/4"
